NC DEPARTMENT OF  
**HEALTH AND  
HUMAN SERVICES**

# PREPARING FOR THE NEW COVID-19 VACCINE MANAGEMENT SYSTEM (CVMS)

## What is CVMS?

CVMS is a secure, cloud-based vaccine management solution for COVID-19 that enables vaccine management and data sharing across providers, hospitals, agencies, and local, state, and federal governments on one common platform.

When the CVMS MVP is launched on 12/10, providers will be able to:

- Enroll in the COVID-19 Vaccine Program and upload employees so they can register for COVID-19 vaccination
- Manage COVID-19 vaccine inventory
- Track COVID-19 vaccine administration

In future CVMS releases, providers will also be able to schedule clinics.

## Who will use CVMS?

NC State officials will enroll providers and verify provider eligibility along with verifying site readiness.

Providers will verify patient eligibility, log dosage administration, and track frequency and timing of additional dosages.

CVMS will be available to select providers for a soft launch on 12/8 and the remaining providers will have access to the system on 12/10.

## Why CVMS?

CVMS provides a flexible approach for managing, delivering, and administering vaccine programs. It consolidates multiple legacy, siloed systems into an integrated platform with configurable modules. This will allow for quicker updates to the system in order to meet business needs. In addition, built-in automation features means less time on routine tasks and more time on high-value activities.
